

SCRATCH SHIELD

WATER-BASED COATING

by Surface Shields

Scratch Shield is a protective skin for porcelain, acrylic, fiberglass & cultured marble. It also protects most polycarbonate, glass, aluminum and stainless steel surfaces. This liquid masking dries to form a tough, durable skin. When the job is complete, simply peel off Scratch Shield.

Scratch Shield is available in 5 gallon and 1 gallon pails. This liquid masking is a water-based coating that can be sprayed on or brushed on. It comes in a dark blue color that is easily visible when cleaning up.

- Protects porcelain, acrylic, fiberglass and stainless steel from dirt, stains, abrasions and paint
- Water-based coating applied by spraying or brushing
- Peels cleanly and easily upon removal
